

Europa The first Canadian Anti-Spam with PSM & Email Appliance from Jovian Technology Inc.

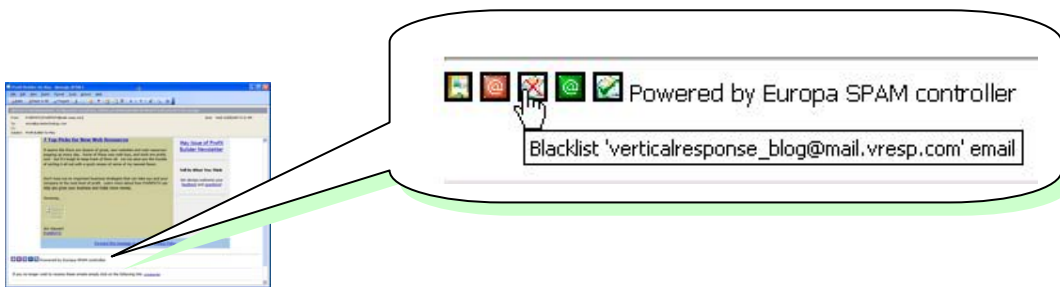

MISSISSAUGA, Ontario, - June 12, 2007 – Jovian Technology Inc. (www.jovianttechnology.com) today announced that the new version 2.0 of its Europa Anti-Spam & Email Appliance is now available and ready to protect email environments.

100% Canadian

Jovian Technology is a 100% Canadian-owned Technology Company. Its email product Europa is the first Canadian Anti-Spam & Email appliance integrated with a patent pending PSM feature. Europa has multi-layer spam & virus filters and offers protection against spam, viruses, phishing attacks, and that it can also act as an email server.

One-click spam filter with PSM

Europa offers its patent-pending **Personalized Spam Management (PSM)** tool. With a one-click directly from an incoming email, users can add the sender's email address to the personal black/whitelist. Through multi-level filter architecture, personal black/whitelist can be self-promoted to the departmental and corporate level. Europa is fully compatible with today's most popular email environments including Microsoft Outlook. It integrates with LDAP/Active Directory and delivers single sign-on.

**PSM provides one click from incoming email to
black/whitelist email sender or domain**

Ready to serve Email server

Europa comes with an Email server. It can be easily configured as a primary or as an automatic fail-over redundant email server. Europa is the most affordable email solution for business continuity.

HCP database protection shield grow with the company

Europa offers **Heuristic Connection Protection (HCP)** at the TCP connectivity level. Each hazardous situation is recorded and added to a local knowledge base. These heuristics grow with the company and grow with time. When the situation re-occurs, the email connection will be dropped at the TCP level without getting deep in the email send-and-receive stage. This greatly saves the bandwidth and keeps the spam at bay.

SMB price with Enterprise class functionality & 30-days money back guarantee

Europa offers a full fledge of features across all models. While Europa delivers best-of-breed functionality, it is affordable even for smaller enterprises. Europa Version 2.0 is available immediately, at a price ranging from \$1,500 to \$10,000 CAD and maximum users ranging from 10 to 500. Europa is distributed through a network of VARs (Value-Added Resellers) who have an in-depth knowledge of today's email environment and customers' pain. With Europa, our VARs aim to defense email spam, support business continuity, and maximize employee productivity. Europa also comes with a 30 days money back guarantee which demonstrates Jovian's commitment to the product. Jovian intends to bring a spam free environment to our end users and leads them to their *email Utopia*.

About Jovian Technology Inc.

Jovian Technology is a Canadian company focused on delivering IT Infrastructure and Application products. Its offerings include the Europa Anti-Spam & Email Appliance, a versatile solution that is easy to manage and that can act as an automatic fail-over email server. Europa protects employee productivity and the integrity of corporate resources.
